WARRANTY

5 year / 125,000 miles (whichever comes first) warranty applies to all new Isuzu D-Max models.

Power full by design

Combining style and strength, The New Isuzu D-Max EV features sophisticated enhancements like distinctive Bi-LED headlights with a blue accent, new Colour LED Rear Combination lights, and EV badging on the front fenders and tailgate.

The eDL40 sports a newly designed dark grey and chrome radiator grille, two-tone silver side steps and 18" alloy wheels. While the top of the range eV-Cross is distinguished with black side steps, a dark grey radiator grille and 'Rugged Style' 18" alloy wheels.

Joy full journeys

Delivering premium comfort, the fuss-free cabin benefits from newly designed leather upholstery[^], a leather steering wheel, and 8-way electrically adjustable driver's seat. You can also look forward to heated front seats, together with dual-zone climate control.

In addition to a 7" driver display, entertainment is streamed via a fully wireless 8" or 9" Multifunction Colour Touchscreen, featuring Android Auto™ and Apple CarPlay™. And in the eV-Cross, an auto dimming rear view mirror and headlight levelling further enhance convenience.

[^]Leather and other materials.

Born electric. Built tough.

The New Isuzu D-Max EV is powered by a robust lithium-ion 66.9 kWh battery with a warranty of 8 years or 100,000 miles. This delivers a WLTP city range of 361.2km and combined range of 263km.

Dual motors produce a total output of 149.3kW (203 PS) and 347.6 Nm of torque, while full-time 4x4 with multi-level regenerative braking ensures the D-Max EV is ready for any terrain. Eco Mode extends the range further, providing a perfect balance of power and efficiency.

Duty full

A clean and capable pick-up that meets your commercial and environmental demands in equal measure.

eDL40

Available in Extended and Double Cab.

EXTERIOR

- New Design Bi-LED Headlights with Blue Accent Colour

²Driver side has auto up/down function, with pinch protection and timer. ³ADAS are driving support systems which may not operate optimally under all driving conditions or for all objects. The driver is always responsible for safe and attentive driving and observance of traffic regulations. See Owner's Manual for complete details on system operation and limitations. ⁴Manual & Intelligent Speed Limiter. ⁵SRS: Supplemental Restraint System. Must be used in conjunction with seatbelts. ⁶According to conditions, the Stop & Start system will automatically stop and restart the engine when the vehicle comes to a standstill to reduce fuel consumption and emissions.

Vehicle Dimensions

All measurements in mm.

¹MPG figures are EU test figures for comparative purposes and may not reflect real driving results. There is a new WLTP test used for fuel consumption and CO₂ figures. The fuel consumption and CO₂ emissions shown are based on the WLTP testing method. Only compare fuel consumption and CO₂ figures with other vehicles tested to the same technical standard. The fuel consumption you achieve in real life conditions and CO₂ produced will depend upon a number of factors including accessories fitted (post-registration), variations in weather, driving styles and vehicle load etc. ²Maximum payload capacity as defined by HM Revenue and Customs for VAT purposes. Payload is gross vehicle weight minus kerb weight. Kerb weights quoted are for vehicles with standard specification. Kerb weight and payload may be influenced by badge level, factory options and dealer fitted accessories. It is the responsibility of the vehicle operator to ensure their vehicle is legally compliant for road use.
